POST http://127.0.0.1:5500/Frontend/index.html 400 (Method Not Allowed)

Error: Request failed with status code 400

Eclipse IDE workspace showing Java code for a Pokémon application. The code includes a `PokemonController` class with methods for creating, updating, and deleting Pokémon, and a `PokemonApplicationTests` class with JUnit tests. The console shows logs for HikariPool shutdown and Hibernate operations. The coverage tool shows 81.13% coverage for the `Pokemon` class.

Web browser showing the Pokémon Database application. The page displays a list of Pokémon with details such as Name, ID, Pokedex Number, Attack, Defence, Speed, Type, and Weakness. The application includes an "Add a Pokémon" button and "Update" and "Remove" buttons for each entry. The browser's developer tools are open, showing the HTML structure and the console output.

Browser tabs: Mail - Sephton, Philip - Outlook, The Auditorium (21MarSoftware), QA Community, Home Page, java - org.hibernate.Mapping, CA How do you test equals and hai.
